

"Die Manufaktur" Solutions made from PE and PP

Our combined experience for your project – special components, pre-fab, problem solver

Complex pipe systems for water supply, sewage and industry

Aliaxis Deutschland is your partner for special components and solutions made from PE and PP. In our "Manufaktur" on Mannheim site we will proudly craft your projects – whether it's a single component or a complicated pipe construction.

Always within reach – locally and world wide

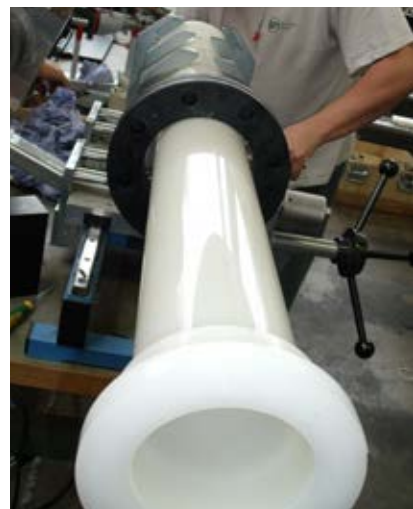

We are your reliable partner in Germany and Austria. Our local expertise comes along with global competence as member of Aliaxis Group, a world market leader for plastic pipe systems. Our mission is to connect people with water and energy.

Aliaxis is a key player in Building, Industry and Infrastructure. Our 16.000 colleagues are busy on more than 80 manufacturing sites and 120 distribution centres all over the world. This plenty of experience, know-how and innovative power is at your disposal, when we work for you. The "Manufaktur" was the first of its kind in Germany and is located on Mannheim site since 2003.

We deliver accurate solutions in manufacturer quality...

Pipe sections, manifolds, branches, chambers, sub-assemblies – all our custom-fit solutions will offer you great advantages by saving installation time or reducing downtime in the construction process. We take care for your project from the planning phase to the installation process, offering decades of experience and unrivalled competence.

The Aliaxis "Manufaktur" predominantly handles PE and PP materials while having the same knowledge in PVDF, PVCU, CPVC and ABS. Our staff, experienced in welding and glueing, disposes of all necessary approvals according to DVS and DVGW rules and standards.

Solution for any sector:

- Water supply
- Sewage
- Water treatment
- Waste water treatment
- Swimming pools
- Surface treatment
- Chemical industry
- Ship building
- Offshore
- Process industry
- Pulp and paper
- Environmental engineering
- Power stations
- Vessel construction
- Hospitals
- Laboratories

... in a large spectrum!

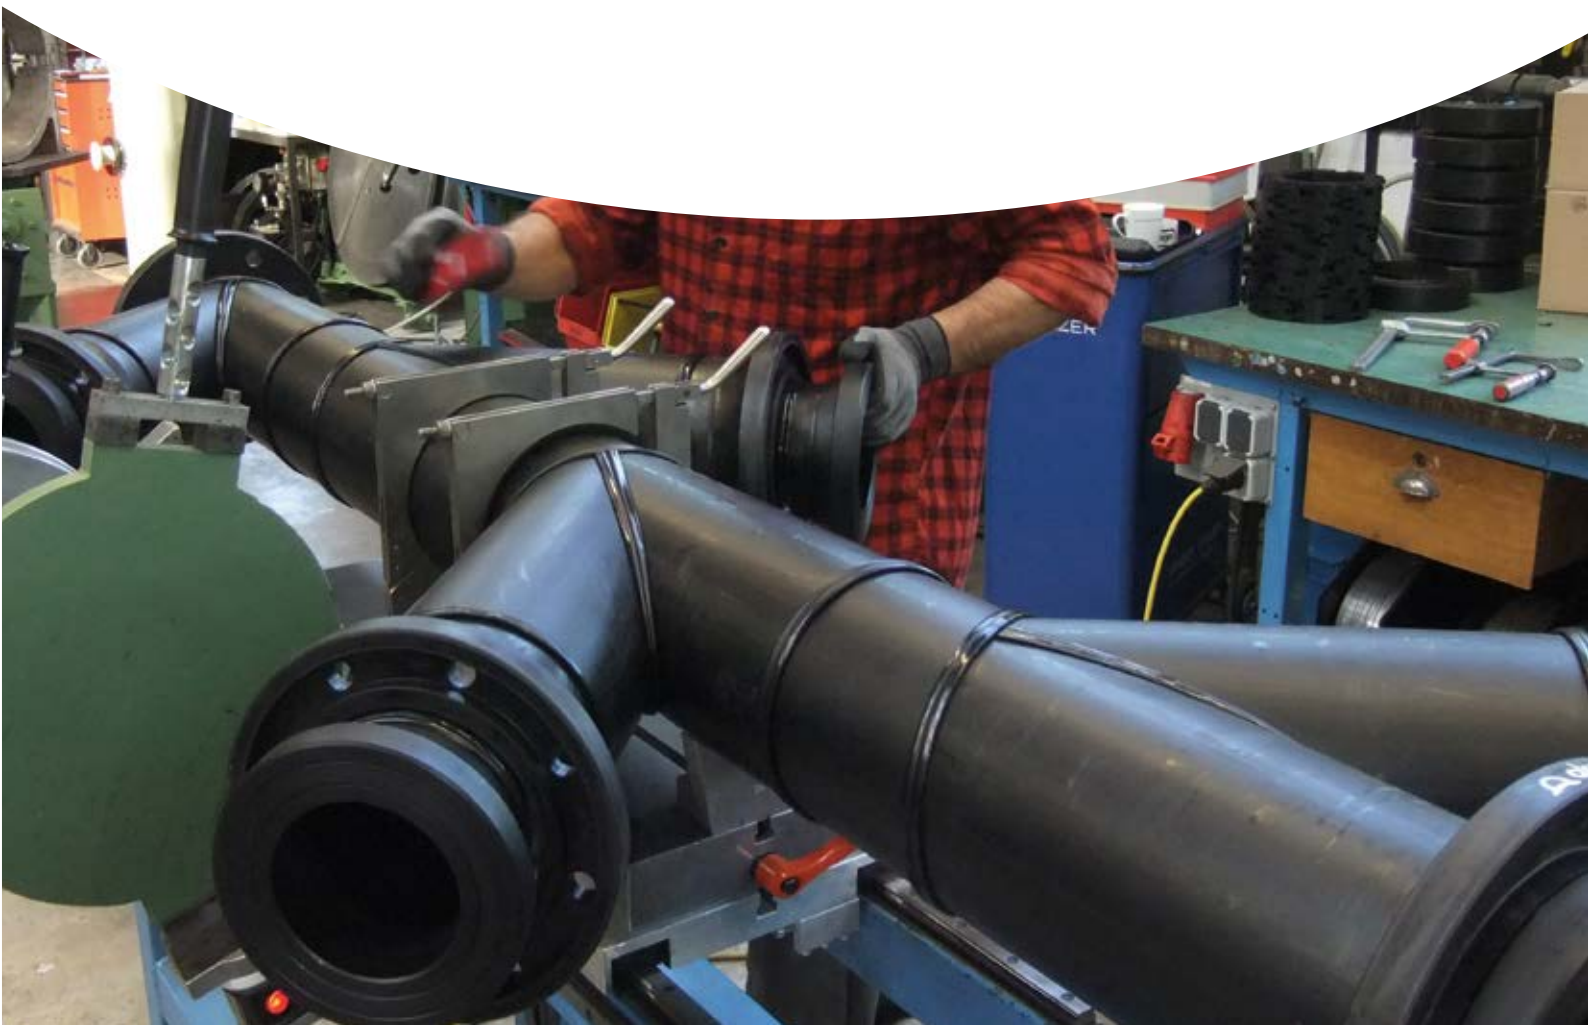

Obviously we can't manufacture everything. The "Manufaktur" is equipped to handle dimensions up to d800mm, exceptionally we may go up to d1200mm. This covers the most common pipework dimensions in industrial applications and civil engineering.

Our focus is on special components for water and waste water treatment, swimming pools, sewage, water supply and cooling systems. Additionally, the "Manufaktur" produces double containment pipe systems for hazardous and temperature-critical fluids. Wall ducts for buildings, pools and chambers as well as sub-assemblies or pre-fabricated items for many different applications are part of our range since more than 40 years.

Looking forward to your project

Special components or pre-fabrication often turn out to be a key part or even a game changer in complex piping projects – either to fit into confined spaces, or to integrate functionalities or to save valuable time in the construction process. The "Manufaktur" is prepared for your project!

Feel free to contact us – we will support you from planning to execution, including on-site service.
