

# FRIALEN SA UNI 225-250

The cost-effective alternative to T-pieces

# FRIALEN SA UNI

## Saddle with outlet spigot Universal SDR 11

Aliaxis offers utilities and construction companies the most economical solutions for branches on pressure pipes >d 315.

The SA UNI saddles are much **easier and faster** to install than T-pieces and quality and tightness can be tested on site.

SA UNI saddles comply with pressure class SDR 11, the relevant technical requirements and approvals. Compared to installing a tee, SA UNI saddles **save up to 50% installation time** and are up to **60% more cost-effective**.

The **UNITOP 250 clamping device** enables the comprehensive processing of up to three dimensions. This saves storage costs and offers users additional flexibility.

The use of the "saddle plus clamping" system is very simple and provides the user with **clear indications** for the correct installation by means of a preset torque wrench. The "Balanced Loading" clamping technology ensures **easy and safe installation**.

With the FWAB SA UNI hole saw, **burr-free and almost heel-free drilling** is possible for maximum hydraulic performance.
